

ENGR. MAQUEE REINHART P. VISITACION

Pulilan, Bulacan | +639215752063 | visitacionmaquee@gmail.com

SUMMARY

Computer Engineering graduate with hands-on experience in full-stack development and cloud infrastructure. Proficient in architecting responsive web applications with React.js, managing relational databases, and streamlining production deployments through containerization and CI/CD pipelines. Committed to building scalable, high-performance systems and improving code quality through modern DevOps practices.

EDUCATION

Bachelor of Science in Computer Engineering
Bulacan State University

September 2021 – June 2026
Malolos, Bulacan

SKILLS

Languages: JavaScript, Python, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js

DevOps & Tools: GitHub Actions, Git, CI/CD Pipelines, Vercel, Render, Docker

Databases & Cloud: PostgreSQL/Supabase

Soft Skills: Problem-solving under pressure, Technical Communication, Attention to Detail, Continuous Learning

PROJECTS

Velocity Engine | Hardware Telemetry & Observability Platform
Developer | Technologies Used: React.js, Node.js, PostgreSQL, Docker, Render

- Engineered a containerized full-stack telemetry platform to monitor and visualize real-time system performance metrics across distributed cloud environments.
- Designed and deployed a scalable architecture utilizing Node.js for telemetry harvesting and PostgreSQL for historical data persistence, integrated via Docker.
- Automated production deployments using Render blueprints and CI/CD workflows, ensuring zero-downtime synchronization and robust cloud-native observability.

Habit Sparks – Full-Stack & DevOps
Developer | Technologies Used: React.js, Supabase, PostgreSQL, GitHub (Git), Vercel CI/CD, JavaScript, Vite, CSS3

- Designed and deployed a full-stack React web application integrated with Supabase (PostgreSQL), establishing an automated CI/CD workflow via GitHub-to-Vercel integration to trigger zero-downtime production builds upon main branch merges.
- Engineered automated client-side data state maintenance logic to handle automated midnight resets and compute dynamic daily streak decay, drastically reducing server-side processing overhead.

EXPERIENCE

Milky Way Control and Power Services
Web Developer Intern

June 2025 – August 2025

- Redesigned and modernized the corporate landing page UI, significantly improving user engagement and visual hierarchy.
- Built and maintained design systems for consistent website functionality and longevity.
- Collaborated with a team of developers for the design and functionality for feedback.
- Successfully migrated the corporate website to a modern cloud hosting platform, optimizing site loading speeds and streamlining ongoing maintenance workflows.
